FOREWORD

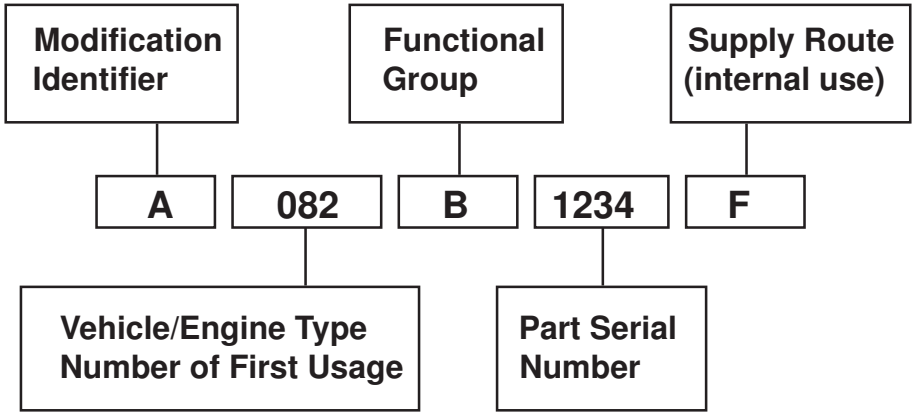
This publication has been designed for use by Lotus Dealers, and may be updated periodically by the issuing of update packages to the dealer network. Lotus policy is one of continuous product improvement and the right is reserved to alter specifications at any time without prior notice.
Whilst every care has been taken to ensure correctness of information, it is impossible to guarantee complete freedom from omissions and errors, or to accept liability arising from such errors or omissions, but nothing herein contained shall affect your statutory rights.

USE OF THE PARTS LIST

This parts list covers the Esprit range, 1996 model year onwards. The manual is arranged in function groups, as defined by the Contents page, and may sometimes use several versions of the same function group to accomodate model variations - take care to establish the full vehicle specification in order to properly identify the applicable parts list section.

PART NUMBERS

Part numbers used in this publication are in the format as follows:



Modification Identifier: This letter identifies a version or modification of the part. Part numbers with different prefix letters may or may not be interchangeable - refer to the remarks column.

Vehicle/Engine Type Number: The type number indicates either the model or engine type on which the part was first used.

026, 036, 045, 500....Elan	076....Eclat S1	084....Eclat S2	111....Elise
050....Elan+2	079....Esprit S1/S2/S2.2	085....Esprit S3	340....340R

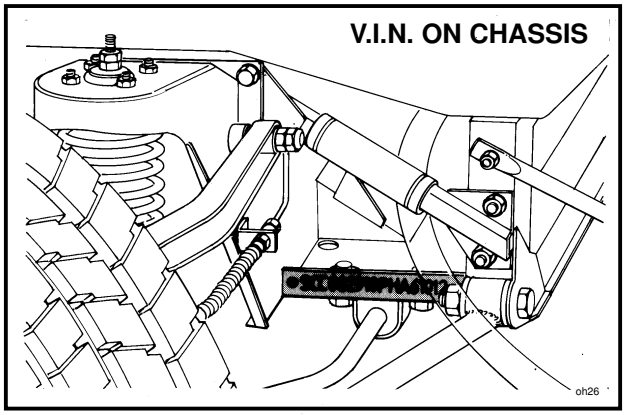
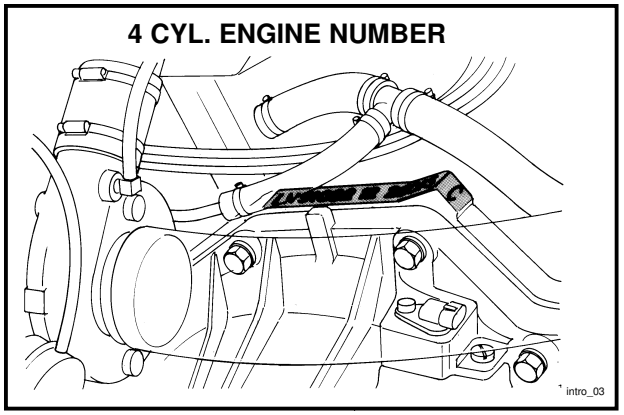
D = Rear Suspension	H = Steering	M = Electrics	S = Exhaust	

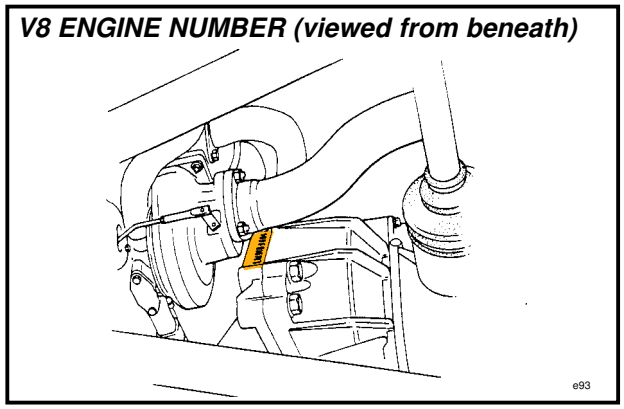
VEHICLE IDENTIFICATION NUMBER & ENGINE NUMBER

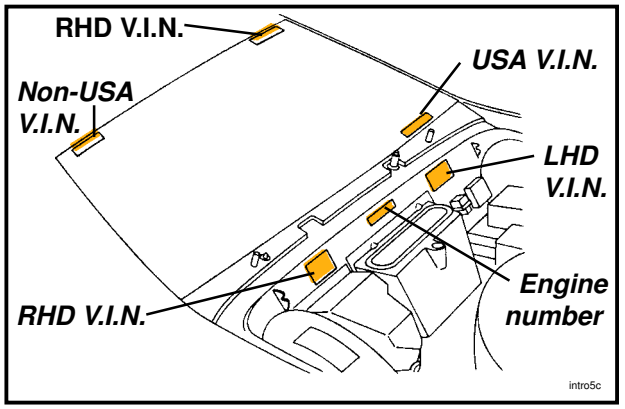
The Vehicle Identification Number (VIN) is stamped onto the chassis frame on the vertical surface of a flange between the inboard pivots of the right hand front suspension lower wishbone, viewable via the right hand front wheelarch. The engine number on 4 cylinder cars is stamped onto a horizontal surface at the right hand rear of the cylinder block, and on V8 models on a vertical flange at the left hand rear of the cylinder block. Both VIN and engine numbers are duplicated on bar code labels fixed to the front bulkhead in the front luggage compartment, and on some vehicles the VIN is repeated for convenience on a label viewable through the windscreen.

Both numbers should always be quoted with any vehicle enquiries, as Factory records are filed against VIN, and specification change points are identified by VIN or engine number. The vehicle licence number may not accurately reflect vehicle age, and may be changed during the car's life, and are an unreliable method of identification.









There are three variations of the VIN; prior to '98 M.Y. there is one for domestic and non-USA export markets, which complies with European Economic Community (EEC) directives; and one for the USA which complies with requirements laid down by the National Highway Traffic Safety Association (NHTSA). From '98 M.Y. a common coding is used. The seventeen characters of the VIN are coded as follows:

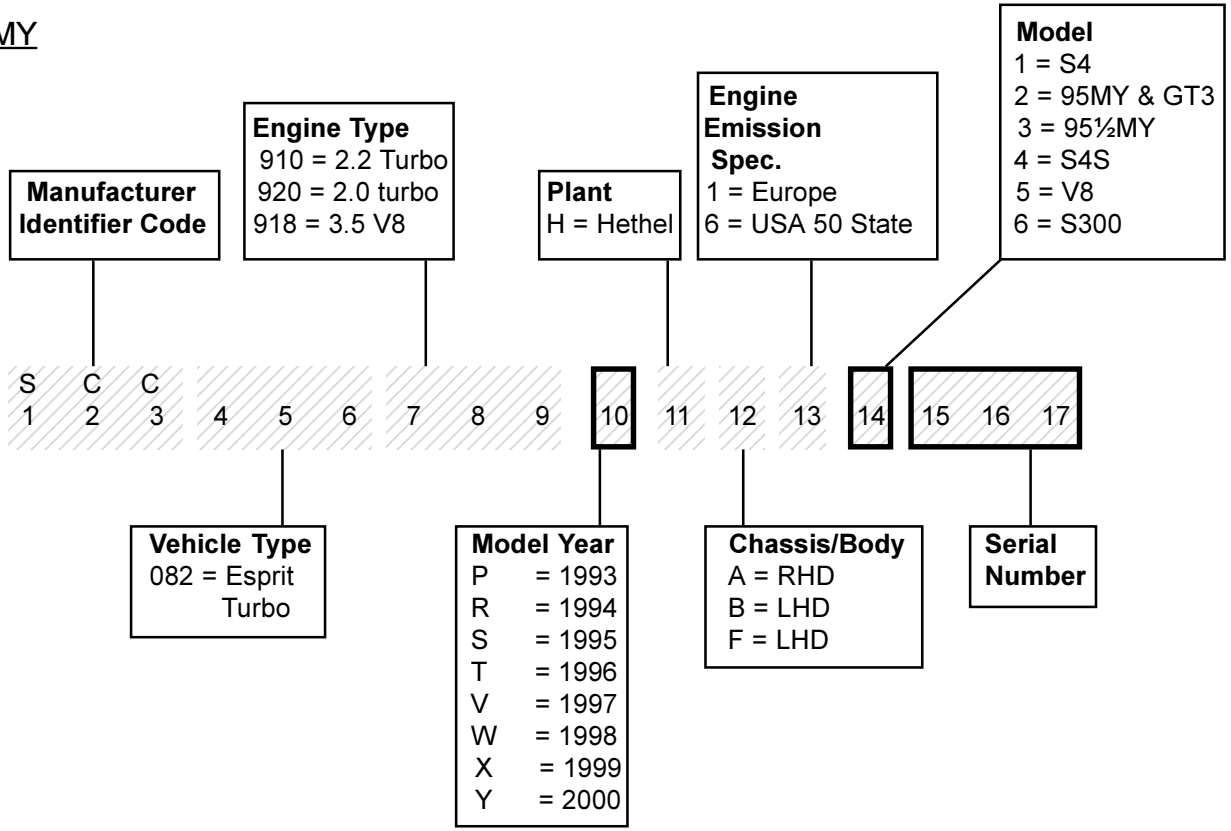
NOTES

1. Prior to '98 M.Y., different serial number sequences are used for the the following variants:

S4 prior to '95 M.Y.:	0001 to 0010, then 1011 onwards
S4 '95 M.Y. & GT3:	2000 onwards
S4S USA:	3000 onwards
S4S non-USA:	4000 onwards
Sport 300:	8001 onwards
Esprit V8:	5009 onwards

2. For change point identification in this manual, only VIN characters 10 (model year) and 14 to 17, (serial number) will be listed. e.g.:
   R 1242 ('94 model year S4, serial 1242)
   R 8030 ('94 model year Sport 300, serial 8030)

Non-USA Prior '98 MY



USA Prior '98 MY
