FOREWORD

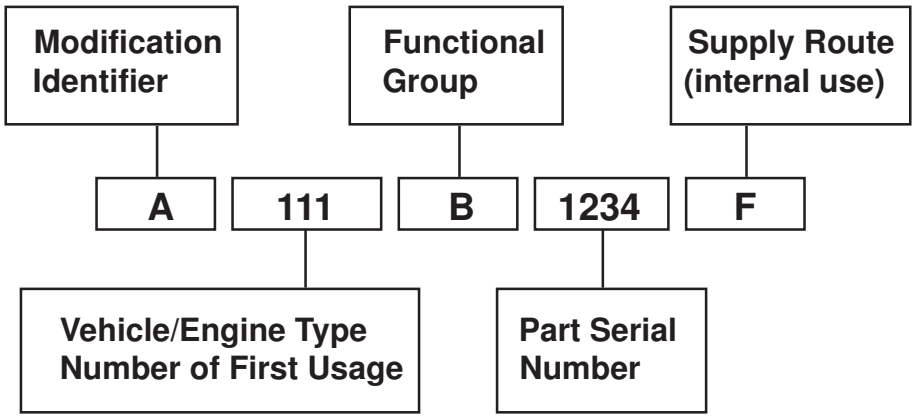
This publication has been designed for use by Lotus Dealers, and may be updated periodically by the issuing of update packages to the dealer network. Lotus policy is one of continuous product improvement and the right is reserved to alter specifications at any time without prior notice.
Whilst every care has been taken to ensure correctness of information, it is impossible to guarantee complete freedom from omissions and errors, or to accept liability arising from such errors or omissions, but nothing herein contained shall affect your statutory rights.

USE OF THE PARTS LIST

This parts list covers the Exige range, 2000 model year onwards. The manual is arranged in function groups, as defined by the Contents page, and may sometimes use several versions of the same function group to accomodate model variations - take care to establish the full vehicle specification in order to properly identify the applicable parts list section.

PART NUMBERS

Part numbers used in this publication are in the format as follows:



Modification Identifier: This letter identifies a version or modification of the part. Part numbers with different prefix letters may or may not be interchangeable - refer to the remarks column.

Vehicle/Engine Type Number: The type number indicates either the model or engine type on which the part was first used.

026, 036, 045,....Elan	076....Eclat S1	084....Eclat S2	111....Elise
050....Elan+2	079....Esprit S1/S2/S2.2	085....Esprit S3	340....340R
046, 054, 065, 074....Europa	082....Esprit Turbo	089....Excel	
075....Elite S1	083....Elite S2	100....Elan 1990	

Functional Group: A single letter indicating the functional area of the parts first use

A = Chassis	E = Engine	J = Brakes	P = Heater & AC	U = Hard Trim
B = Body	F = Transmission	K = Cooling	Q = Clutch	V = Soft Trim
C = Front Suspension	G = Wheels & Tyres	L = Fuel System	R = Final Drive	W = Standard Fixings
D = Rear Suspension	H = Steering	M = Electrics	S = Exhaust	

VEHICLE IDENTIFICATION NUMBER & ENGINE NUMBER

The Vehicle Identification Number (V.I.N.) is stamped on the chassis in the right hand rear sill area, and is also printed on a label stuck to the body in the front services compartment. The engine number is marked on a vertical patch at the left hand end of the forward face of the cylinder block, and is most easily viewed using a mirror.

Both numbers should always be quoted with any vehicle enquiries, as Factory records are filed against V.I.N., and specification change points are identified by V.I.N. or engine number. The vehicle licence number may not accurately reflect vehicle age, may also be changed during the car's life, and is an unreliable method of vehicle identification.

The V.I.N. comprises 17 characters, coded in accordance with European Economic Community (EEC) directives. For change point identification in Service Notes and Service Parts Lists, characters 10 (model year) and 15 - 17, or 14 - 17 (serial number) will be quoted.
